Annual Index — Vol. 18, 1983

Canadian Journal of Ophthalmology — Journal canadien d'ophtalmologie

Editores emeriti ..... Drs. C.C. Ewing, J.C. McCulloch, D.W. Mills, H.N. Reed
Editor-in-chief/Rédacteur en chef ..... Dr. D.J. Addison
Associate editor/Rédactrice associée ..... Ms. A. Bolster
Editorial board/Bureau de rédaction ..... Drs. I.S. Begg, J.R. Brunette, I.A. Chisholm, G. Côté, P.L. Davis, J.R. Gonder, R.P. LeBlanc, J.F. Morgan, R.A. Morgan, R. Pager, R.J. Schneider, J.S. Speakman
Translation editor/Rédacteur à la traduction ..... Dr. J.R. Brunette
Book review editor/Rédacteur à la critique des livres ..... Dr. B.C. Leonard

Subjects

Abducens nucleus:
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Acetazolamide:
Reversibility of a glaucomatous visual field defect after acetazolamide therapy, Flammer J, et al, *139–141*
Adenocarcinoma:
Orbital metastasis of prostatic carcinoma, Sher JH, et al, *248–250*
Age factors:
Senile entropion: the importance of eyelid laxity, Hurwitz JJ, et al, *235–237*
Tests of binocular function after surgery for infantile esotropia (C), Von Noorden GK, et al, *205–206*
Albinism:
Atypical sensory nystagmus and its surgical management, Flanders M, et al, *349–351*
Alcohol, ethyl:
Ethanol concentrations in the eye (C), Basu PK, et al, *206–207*
Amaurosis fugax:
Ophthalmodynamometry revisited, Mullie MA, et al, *165–168*
Amblyopia:
Brown's syndrome: fusion status and amblyopia, Clarke WN, et al, *118–123*
Sensory results following treatment of infantile esotropia, Pratt-Johnson JA, et al, *175–177*
Unilateral congenital ptosis and amblyopia, Beneish R, et al, *127–130*
Amniotic bands:
Uveal coloboma associated with amniotic band syndrome, BenEzra D, et al, *136–138*
Amphetamine:
Alternating Horner's syndrome: is it or isn't it?, Moniz E, et al, *296–298*
Amyloid:
Lens exfoliation: an ongoing survey (E), Speakman JS, *313*
Anesthesia:
Effect of retrobulbar anesthesia on ocular tension, Breslin CW, et al, *223–225*
Effects of nitrous oxide anesthesia on intraocular air volume, Boucher MC, et al, *246–247*
Aneurysm:
Eye signs in 611 cases of posterior fossa aneurysms: their diagnostic and prognostic value, McKinna AJ, *3–6*
Angiography:
Ophthalmodynamometry revisited, Mullie MA, et al, *165–168*
Anisometropia:
Unilateral congenital ptosis and amblyopia, Beneish R, et al, *127–130*
Aqueous humour:
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, *337–339*
Arteriovenous malformations:
Arteriovenous malformations of the posterior cerebral hemispheres, Maleki M, et al, *22–27*
Artificial implants:
Pseudophakic retinal detachment, Ramsay RC, et al, *262–265*
Auditory evoked potentials:
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Auditory pathway:
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Automatic data processing:
JO and STATJO: programs for investigating the visual field with the Octopus automatic perimeter, Flammer J, et al, *115–117*
Reversibility of a glaucomatous visual field defect after acetazolamide therapy, Flammer J, et al, *139–141*

Basement membrane:
Lens exfoliation: an ongoing survey (E), Speakman JS, *131*
Bence Jones protein:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Beta-adrenergic receptor blockaders:
Effect of timolol eye drops in subjects receiving systemic propranolol therapy, Blondeau P, et al, *18–21*
Timolol: a 4-year follow-up study, Markowitz S, et al, *278–280*
Blepharoptosis:
Isolated bilateral complete ptosis, Conway VH, et al, *37–40*
Blindness:
Hereditary diseases as causes of blindness in Newfoundland: preliminary report, Green JS, et al, *281–284*
Blood vessels:
Central retinal vein obstruction associated with mitral valve prolapse, Gonder JR, et al, *220–222*
Relationship between baring of circumlinear vessels of the optic disc and glaucomatous visual field loss, Balazsi G, et al, *333–336*

Bone marrow disease:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Corneal and conjunctival deposits in monoclonal gammopathy: addendum and correction (C), Cherry PMH, et al, *256*
Brainstem:
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Brown's syndrome:
Brown's syndrome: fusion status and amblyopia, Clarke WN, et al, *118–123*

Canthaxanthine: see Carotenoids
Carotenoids:
La rétinopathie à la canthaxanthine: 1. Etude clinique de 51 consommateurs, Boudreault G, et al, *325–328*
Carotid artery diseases:
Ophthalmodynamometry revisited, Mullie MA, et al, *165–168*
Cataract:
Combined trabeculectomy and cataract extraction: modified technique, Fanous S, et al, *274–277*
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, *337–339*
Cataract extraction:
Combined trabeculectomy and cataract extraction: modified technique, Fanous S, et al, *274–277*
Pseudophakic retinal detachment, Ramsay RC, et al, *262–265*
Cellulitis:
Management of acquired dacryocystitis, Hurwitz JJ, et al, *213–216*
Cerebrovascular disorders:
Arteriovenous malformations of the posterior cerebral hemispheres, Maleki M, et al, *22–27*
The pupil in stroke, Spencer JA, et al, *226–227*
Chemiluminescence:
Toxicity of the chemiluminescent material Cyalume in anatomic assessment of the nasolacrimal system, Vettese T, et al, *131–135*
Chemotherapy:
Combined local chemotherapy for a spontaneously occurring intraocular tumour in a cat, Rootman J, et al, *185–187*
Chloroquine:
Critical flicker fusion frequency in early chloroquine retinopathy, Al Khamis AR, et al, *217–219*
Critical flicker fusion frequency in early chloroquine retinopathy: correction (C), Easterbrook M, et al, *356*
Choroid diseases:
Extraocular extension of malignant melanoma of the uvea, Brownstein S, et al, *45–48*
Ciliary body diseases:
Ciliary block glaucoma: malignant glaucoma in the absence of a history of surgery and of miotic therapy, Fanous S, et al, *302–303*
Lens exfoliation: an ongoing survey (E), Speakman JS, *313*
The origin of senile lens exfoliation, Ghosh M, et al, *340–343*
Cocaine:
Alternating Horner's syndrome: is it or isn't it?, Moniz E, et al, *296–298*
Coloboma:
Uveal coloboma associated with amniotic band syndrome, BenEzra D, et al, *136–138*
Computer-assisted diagnosis:
Of objects and images: Is there more to NMR than meets the eye? (E), Driedger AA, *157–158*
Congenital abnormalities:
Abnormal blood vessels on the optic disc, Anderson DP, et al, *108–114*
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, *256*
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, *7–10*
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Congenital hereditary downbeat nystagmus, Bixenman WW, *344–348*
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Hereditary diseases as causes of blindness in Newfoundland: preliminary report, Green JS, et al, *281–284*
Lenz microphthalmia: a malformation syndrome with variable expression of multiple congenital anomalies, Glanz A, et al, *41–44*
Optic disc colobomas, Connolly WES, et al, *299–301*
Primary infantile glaucoma: influence of age at onset, Morin JD, *233–234*
Uveal coloboma associated with amniotic band syndrome, BenEzra D, et al, *136–138*
Cornea:
Distribution of morphine in the eye tissues and fluids of rabbits after systemic administration and after transfer via corneal grafting, Basu PK, et al, *241–245*
Ethanol concentrations in the eye (C), Basu PK, et al, *206–207*
Corneal diseases:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Corneal and conjunctival deposits in monoclonal gammopathy: addendum and correction (C), Cherry PMH, et al, *256*
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, *293–295*
Cryotherapy:
Pseudophakic retinal detachment, Ramsay RC, et al, *262–265*
Cyalume:
Toxicity of the chemiluminescent material Cyalume in anatomic assessment of the nasolacrimal system, Vettese T, et al, *131–135*
Cycloplegia:
Ciliary block glaucoma: malignant glaucoma in the absence of a history of surgery and of miotic therapy, Fanous S, et al, *302–303*

Dacryocystitis:
Management of acquired dacryocystitis, Hurwitz JJ, et al, *213–216*
Dacryocystography:
Management of acquired dacryocystitis, Hurwitz JJ, et al, *213–216*
Dacryocystorhinostomy:
Management of acquired dacryocystitis, Hurwitz JJ, et al, *213–216*
Dexamethasone:
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, *293–295*
Diabetes mellitus:
Optic neuritis, diabetes mellitus and multiple sclerosis: a three-way association, Warren SA, et al, *228–232*
Diabetic retinopathy:
Electroretinographic evaluation of diabetic retinopathy: sensitivity of amplitude and time of response, Brunette JR, et al, *285–289*
Diagnosis:
An approach to diagnosis of orbital disease, Rootman J, *102–107*
Diplopia:
Bilateral superior oblique palsy: diagnosis and treatment, Wise J, et al, *28–32*
Eye signs in 611 cases of posterior fossa aneurysms: their diagnostic and prognostic value, McKinna AJ, *3–6*
Dissociated vertical divergence:
Sensory results following treatment of infantile esotropia, Pratt-Johnson JA, et al, *175–177*
Drug interactions:
Effect of timolol eye drops in subjects receiving systemic propranolol therapy, Blondeau P, et al, *18–21*

Drug therapy:
Distribution of morphine in the eye tissues and fluids of rabbits after systemic administration and after transfer via corneal grafting, Basu PK, et al, *241–245*
Drug therapy, combination:
Effect of timolol eye drops in subjects receiving systemic propranolol therapy, Blondeau P, et al, *18–21*
Drug toxicity:
Critical flicker fusion frequency in early chloroquine retinopathy, Al Khamis AR, et al, *217–219*
Critical flicker fusion frequency in early chloroquine retinopathy: correction (C), Easterbrook M, et al, *365*
Duane's syndrome:
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Dysproteinemia:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Corneal and conjunctival deposits in monoclonal gammopathy: addendum and correction (C), Cherry PMH, et al, *256*

Ectropion:
Cicatricial ectropion due to essential skin shrinkage: treatment with rotational upper-lid pedicle flaps, Hurwitz JJ, et al, *269–273*
Edema:
Comparison of iris fixation and anterior chamber intraocular lens implants, MacInnis BJ, et al, *15–17*
Electroretinography:
Effects of dark adaptation on implicit time in the clinical electroretinogram, Brunette JR, et al, *33–36*
Effects of intensity of stimulation on signs of acute ischemia in the electroretinogram, Brunette JR, et al, *290–292*
Electroretinographic evaluation of diabetic retinopathy: sensitivity of amplitude and time of response, Brunette JR, et al, *285–289*
Hyper-response and delay in the electroretinogram in acute ischemia, Brunette JR, et al, *188–193*
Encephalitis:
Isolated bilateral complete ptosis, Conway VH, et al, *37–40*
Enophthalmos:
An approach to diagnosis of orbital disease, Rootman J, *102–107*
Entropion:
Senile entropion: the importance of eyelid laxity, Hurwitz JJ, *235–237*
Epilepsy:
Arteriovenous malformations of the posterior cerebral hemispheres, Maleki M, et al, *22–27*
Epinephrine:
Effect of retrobulbar anesthesia on ocular tension, Breslin CW, et al, *223–225*
Epiphora:
Management of acquired dacryocystitis, Hurwitz JJ, et al, *213–216*
Senile entropion: the importance of eyelid laxity, Hurwitz JJ, *235–237*
Esotropia: see Strabismus
Exophthalmos:
An approach to diagnosis of orbital disease, Rootman J, *102–107*
Management of inadequate transantral orbital decompression with extended lateral orbitotomy, Hurwitz J, et al, *194–196*
Myositic pseudotumour of the orbit, Ross WH, *199–201*
Prevention and management of postoperative lateral upper-lid retraction in Graves' disease, Hurwitz JJ, et al, *329–332*
Exotropia: see Strabismus
Extraocular muscles:
Bilateral superior oblique palsy: diagnosis and treatment, Wise J, et al, *28–32*
Brown's syndrome: fusion status and amblyopia, Clarke WN, et al, *118–123*
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
The oculocardiac reflex in strabismus surgery, Milot JA, et al, *314–317*
Extraocular muscles, paralysis of:
Bilateral superior oblique palsy: diagnosis and treatment, Wise J, et al, *28–32*
Brown's syndrome: fusion status and amblyopia, Clarke WN, et al, *118–123*
Further observations on the auditory brainstem response in Duane's syndrome, Taylor MJ, et al, *238–240*
Eyelid diseases:
Prevention and management of postoperative lateral upper-lid retraction in Graves' disease, Hurwitz JJ, et al, *329–332*
Senile entropion: the importance of eyelid laxity, Hurwitz JJ, *235–237*

Flicker fusion:
Critical flicker fusion frequency in early chloroquine retinopathy, Al Khamis AR, et al, *217–219*
Critical flicker fusion frequency in early chloroquine retinopathy: correction (C), Easterbrook M, et al, *356*
Fusion:
Tests of binocular function after surgery for infantile esotropia (C), Von Noorden GK, et al, *205–206*

Gammaglobulinopathy:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Corneal and conjunctival deposits in monoclonal gammopathy: addendum and correction (C), Cherry PMH, et al, *256*
Glaucoma:
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, *256*
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, *7–10*
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Ciliary block glaucoma: malignant glaucoma in the absence of a history of surgery and of miotic therapy, Fanous S, et al, *302–303*
Combined trabeculectomy and cataract extraction: modified technique, Fanous S, et al, *274–277*
Effects of intensity of stimulation on signs of acute ischemia in the electroretinogram, Brunette JR, et al, *290–292*
Is the green light "Go"? (E), LeBlanc RP, *101*
JO and STATJO: programs for investigating the visual field with the Octopus automatic perimeter, Flammer J, et al, *115–117*
Juvenile xanthogranuloma, Cadera W, et al, *169–174*
The lamina cribrosa and visual field defects in open-angle glaucoma, Susanna R Jr, *124–126*
The Peritest automatic perimeter in screening for glaucomatous visual field defects, Douglas GR, *318–320*
Primary infantile glaucoma: influence of age at onset, Morin JD, *233–234*
Relationship between baring of circumlinear vessels of the optic disc and glaucomatous visual field loss, Balazsi G, et al, *333–336*
Reversibility of a glaucomatous visual field defect after acetazolamide therapy, Flammer J, et al, *139–141*
Sarcoïdose et rubeosis iridis, Mayer J, et al, *197–198*
Spherophakia in a Newfoundland family: 8 years' experience, Johnson GJ, et al, *159–164*
Timolol: a 4-year follow-up study, Markowitz S, et al, *278–280*

Health manpower:
"Be bold; but not too bold!" (E), Morgan R, *1–2*
Hemorrhage:
An approach to diagnosis of orbital disease, Rootman J, *102–107*

Subhyaloid hemorrhage in osteogenesis imperfecta tarda, Khalil MK, *251–252*
Hereditary diseases:
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, *256*
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, *7–10*
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Congenital hereditary downbeat nystagmus, Bixenman WW, *344–348*
Hereditary diseases as causes of blindness in Newfoundland: preliminary report, Green JS, et al, *281–284*
Lenz microphthalmia: a malformation syndrome with variable expression of multiple congenital anomalies, Glanz A, et al, *41–44*
Spherophakia in a Newfoundland family: 8 years' experience, Johnson GJ, et al, *159–164*
Subhyaloid hemorrhage in osteogenesis imperfecta tarda, Khalil MK, *251–252*
Homonymous hemianopia:
Arteriovenous malformations of the posterior cerebral hemispheres, Maleki M, et al, *22–27*
Horner's syndrome:
Alternating Horner's syndrome: is it or isn't it?, Moniz E, et al, *296–298*
The pupil in stroke, Spencer JA, et al, *226–227*
Hypertension:
Eye signs in 611 cases of posterior fossa aneurysms: their diagnostic and prognostic value, McKinna AJ, *3–6*

Immunologic diseases:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Corneal and conjunctival deposits in monoclonal gammopathy: addendum and correction (C), Cherry PMH, et al, *256*
Indomethacin:
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, *293–295*
Infarction:
The pupil in stroke, Spencer JA, et al, *226–227*
Inflammation:
An approach to diagnosis of orbital disease, Rootman J, *102–107*
Internal carotid artery:
Ophthalmodynamometry revisited, Mullie MA, et al, *165–168*
Intoxication: see Poisoning
Intraocular pressure:
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, *256*
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, *7–10*
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Ciliary block glaucoma: malignant glaucoma in the absence of a history of surgery and of miotic therapy, Fanous S, et al, *302–303*
Effect of retrobulbar anesthesia on ocular tension, Breslin CW, et al, *223–225*
Effect of timolol eye drops in subjects receiving systemic propranolol therapy, Blondeau P, et al, *18–21*
The lamina cribrosa and visual field defects in open-angle glaucoma, Susanna R Jr, *124–126*
Relationship between baring of circumlinear vessels of the optic disc and glaucomatous visual field loss, Balazsi G, et al, *333–336*
Timolol: a 4-year follow-up study, Markowitz S, et al, *278–280*
Iophendylate:
Toxicity of the chemiluminescent material Cyalume in anatomic assessment of the nasolacrimal system, Vettese T, et al, *131–135*

Iridogoniodysgenesis:
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, *256*
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, *7–10*
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Iridotomy:
Is the green light "Go"? (E), LeBlanc RP, *101*
Iris diseases:
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, *256*
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, *7–10*
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Juvenile xanthogranuloma, Cadera W, et al, *169–174*
Lens exfoliation: an ongoing survey (E), Speakman JS, *313*
The origin of senile lens exfoliation, Ghosh M, et al, *340–343*
Ischemia:
Effects of intensity of stimulation on signs of acute ischemia in the electroretinogram, Brunette JR, et al, *290–292*
Hyper-response and delay in the electroretinogram in acute ischemia, Brunette JR, et al, *188–193*

The Journal:
Four years before the masthead (E), Mills D, *211–212*
Interregnum (E), Addison DJ, *261*
Juvenile xanthogranuloma:
Juvenile xanthogranuloma, Cadera W, et al, *169–174*

Lacrimal apparatus:
Toxicity of the chemiluminescent material Cyalume in anatomic assessment of the nasolacrimal system, Vettese T, et al, *131–135*
Lacrimal apparatus diseases:
Management of acquired dacryocystitis, Hurwitz JJ, et al, *213–216*
Toxicity of the chemiluminescent material Cyalume in anatomic assessment of the nasolacrimal system, Vettese T, et al, *131–135*
Lactate dehydrogenase:
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, *337–339*
Lamina cribrosa sclerae:
The lamina cribrosa and visual field defects in open-angle glaucoma, Susanna R Jr, *124–126*
Lasers:
Is the green light "Go"? (E), LeBlanc RP, *101*
Lens diseases:
Lens exfoliation: an ongoing survey (E), Speakman JS, *313*
The origin of senile lens exfoliation, Ghosh M, et al, *340–343*
Spherophakia in a Newfoundland family: 8 years' experience, Johnson GJ, et al, *159–164*
Lens dislocation and subluxation:
Spherophakia in a Newfoundland family: 8 years' experience, Johnson GJ, et al, *159–164*
Lens implantation, intraocular: see Lenses, intraocular
Lenses, intraocular:
C-loop posterior chamber lenses (C), Simcoe CW; Dyson C, *153*
Comparison of iris fixation and anterior chamber intraocular lens implants, MacInnis BJ, et al, *15–17*
Pseudophakic retinal detachment, Ramsay RC, et al, *262–265*
Leukokoria:
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, *337–339*
Lidocaine:
Effect of retrobulbar anesthesia on ocular tension, Breslin CW, et al, *223–225*

Light-chain immunoglobulins:
Corneal and conjunctival deposits in monoclonal gammopathy, Cherry PMH, et al, *142–149*
Lutein:
La rétinopathie à la canthaxanthine: 1. Etude clinique de 51 consommateurs, Boudreault G, et al, *325–328*
Lymphoma:
Combined local chemotherapy for a spontaneously occurring intraocular tumour in a cat, Rootman J, et al, *185–187*
Lymphosarcoma:
Combined local chemotherapy for a spontaneously occurring intraocular tumour in a cat, Rootman J, et al, *185–187*

Macula lutea:
Preretinal membranectomy in idiopathic preretinal macular fibrosis, Mandelcorn MS, et al, *321–324*
La rétinopathie à la canthaxanthine: 1. Etude clinique de 51 consommateurs, Boudreault G, et al, *325–328*
Medical education:
"Be bold; but not too bold!" (E), Morgan R, *1–2*
Melanoma:
Extraocular extension of malignant melanoma of the uvea, Brownstein S, et al, *45–48*
Membranes:
Preretinal membranectomy in idiopathic preretinal macular fibrosis, Mandelcorn MS, et al, *321–324*
Metastasis:
Orbital metastasis of prostatic carcinoma, Sher JH, et al, *248–250*
Methotrexate:
Combined local chemotherapy for a spontaneously occurring intraocular tumour in a cat, Rootman J, et al, *185–187*
Microphthalmia:
Lenz microphthalmia: a malformation syndrome with variable expression of multiple congenital anomalies, Glanz A, et al, *41–44*
Optic disc colobomas, Connolly WES, et al, *299–301*
Uveal coloboma associated with amniotic band syndrome, BenEzra D, et al, *136–138*
Migraine:
Arteriovenous malformations of the posterior cerebral hemispheres, Maleki M, et al, *22–27*
Mitral valve prolapse:
Central retinal vein obstruction associated with mitral valve prolapse, Gonder JR, et al, *220–222*
Monitoring, physiologic:
The oculocardiac reflex in strabismus surgery, Milot JA, et al, *314–317*
Morphine:
Distribution of morphine in the eye tissues and fluids of rabbits after systemic administration and after transfer via corneal grafting, Basu PK, et al, *241–245*
Multiple myeloma:
Corneal and conjunctival deposits in monoclonal gammopathy: addendum and correction (C), Cherry PMH, et al, *256*
Multiple sclerosis:
Optic neuritis, diabetes mellitus and multiple sclerosis: a three-way association, Warren SA, et al, *228–232*
Mydriasis:
Alternating Horner's syndrome: is it or isn't it?, Moniz E, et al, *296–298*
The pupil in stroke, Spencer JA, et al, *226–227*
Myopia:
Spherophakia in a Newfoundland family: 8 years' experience, Johnson GJ, et al, *159–164*
Myositis:
Myositic pseudotumour of the orbit, Ross WH, *199–201*

Neoplasms:
An approach to diagnosis of orbital disease, Rootman J, *102–107*
Combined local chemotherapy for a spontaneously occurring intraocular tumour in a cat, Rootman J, et al, *185–187*
Extraocular extension of malignant melanoma of the uvea, Brownstein S, et al, *45–48*
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, *337–339*
Orbital metastasis of prostatic carcinoma, Sher JH, et al, *248–250*
Neovascularization:
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, *293–295*
Sarcoïdose et rubeosis iridis, Mayer J, et al, *197–198*
Nitrous oxide:
Effects of nitrous oxide anesthesia on intraocular air volume, Boucher MC, et al, *246–247*
Norepinephrine:
Alternating Horner's syndrome: is it or isn't it?, Moniz E, et al, *296–298*
Nuclear magnetic resonance:
Of objects and images: Is there more to NMR than meets the eye? (E), Driedger AA, *157–158*
Nuclear medicine:
Of objects and images: Is there more to NMR than meets the eye? (E), Driedger AA, *157–158*
Nystagmus:
Atypical sensory nystagmus and its surgical management, Flanders M, et al, *349–351*
Congenital hereditary downbeat nystagmus, Bixenman WW, *344–348*
Sensory results following treatment of infantile esotropia, Pratt-Johnson JA, et al, *175–177*

Oculomotor nerve:
Isolated bilateral complete ptosis, Conway VH, et al, *37–40*
Ophthalmic artery:
Ophthalmodynamometry revisited, Mullie MA, et al, *165–168*
Ophthalmodynamometry:
Ophthalmodynamometry revisited, Mullie MA, et al, *165–168*
Optic disc:
Abnormal blood vessels on the optic disc, Anderson DP, et al, *108–114*
Detection of drusen of the optic disc in children by B-scan ultrasonography, Noël LP, et al, *266–268*
Optic disc colobomas, Connolly WES, et al, *299–301*
Relationship between baring of circumlinear vessels of the optic disc and glaucomatous visual field loss, Balazsi G, et al, *333–336*
Optic nerve diseases:
Autosomal dominant iridogoniodysgenesis: glaucoma management, Wyatt HT, et al, *11–14*
Detection of drusen of the optic disc in children by B-scan ultrasonography, Noël LP, et al, *266–268*
The lamina cribrosa and visual field defects in open-angle glaucoma, Susanna R Jr, *124–126*
Optic neuritis, diabetes mellitus and multiple sclerosis: a three-way association, Warren SA, et al, *228–232*
Relationship between baring of circumlinear vessels of the optic disc and glaucomatous visual field loss, Balazsi G, et al, *333–336*
Optic neuritis:
Optic neuritis, diabetes mellitus and multiple sclerosis: a three-way association, Warren SA, et al, *228–232*
Optociliary vessels:
Abnormal blood vessels on the optic disc, Anderson DP, et al, *108–114*
Orbital decompression:
Management of inadequate transantral orbital decompression with extended lateral orbitotomy, Hurwitz J, et al, *194–196*
Orbital diseases:
An approach to diagnosis of orbital disease, Rootman J, *102–107*

Management of inadequate transantral orbital decompression with extended lateral orbitotomy, Hurwitz J, et al, 194–196
Myositic pseudotumour of the orbit, Ross WH, 199–201
Orbital pseudotumour:
Myositic pseudotumour of the orbit, Ross WH, 199–201
Osteogenesis imperfecta:
Subhyaloid hemorrhage in osteogenesis imperfecta tarda, Khalil MK, 251–252

Papillophlebitis:
Central retinal vein obstruction associated with mitral valve prolapse, Gonder JR, et al, 220–222
Perimetry:
Critical flicker fusion frequency in early chloroquine retinopathy, Al Khamis AR, et al, 217–219
Critical flicker fusion frequency in early chloroquine retinopathy: correction (C), Easterbrook M, et al, 356
JO and STATJO: programs for investigating the visual field with the Octopus automatic perimeter, Flammer J, et al, 115–117
The Peritest automatic perimeter in screening for glaucomatous visual field defects, Douglas GR, 318–320
Reversibility of a glaucomatous visual field defect after acetazolamide therapy, Flammer J, et al, 139–141
Phthalic acids:
Toxicity of the chemiluminescent material Cyalume in anatomic assessment of the nasolacrimal system, Vettese T, et al, 131–135
Platelet coagulant hyperactivity:
Central retinal vein obstruction associated with mitral valve prolapse, Gonder JR, et al, 220–222
Poisoning:
La rétinopathie à la canthaxanthine: 1. Etude clinique de 51 consommateurs, Boudreault G, 325–328
Practice management:
"Be bold; but not too bold!" (E), Morgan R, 1–2
Primary health care:
"Be bold; but not too bold!" (E), Morgan R, 1–2
Propranolol:
Effect of timolol eye drops in subjects receiving systemic propranolol therapy, Blondeau P, et al, 18–21
Proptosis:
An approach to diagnosis of orbital disease, Rootman J, 102–107
Prostaglandin antagonists:
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, 293–295
Prostaglandins:
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, 293–295
Prostate:
Orbital metastasis of prostatic carcinoma, Sher JH, et al, 248–250
Ptosis:
Unilateral congenital ptosis and amblyopia, Beneish R, et al, 127–130
See Blepharoptosis
Pupil:
Alternating Horner's syndrome: is it or isn't it?, Moniz E, et al, 296–298
The pupil in stroke, Spencer JA, et al, 226–227

Radionuclide imaging:
Management of acquired dacryocystitis, Hurwitz JJ, et al, 213–216
Reflex:
The oculocardiac reflex in strabismus surgery, Milot JA, et al, 314–317
Retina:
Effects of dark adaptation on implicit time in the clinical electroretinogram, Brunette JR, et al, 33–36
Effects of intensity of stimulation on signs of acute ischemia in the electroretinogram, Brunette JR, et al, 290–292
Electroretinographic evaluation of diabetic retinopathy: sensitivity of amplitude and time of response, Brunette JR, et al, 285–289
Retinal detachment:
Effects of nitrous oxide anesthesia on intraocular air volume, Boucher MC, et al, 246–247
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, 337–339
Preretinal membranectomy in idiopathic preretinal macular fibrosis, Mandelcorn MS, et al, 321–324
Pseudophakic retinal detachment, Ramsay RC, et al, 262–265
Retinal diseases:
Critical flicker fusion frequency in early chloroquine retinopathy, Al Khamis AR, et al, 217–219
Critical flicker fusion frequency in early chloroquine retinopathy: correction (C), Easterbrook M, et al, 356
Effects of intensity of stimulation on signs of acute ischemia in the electroretinogram, Brunette JR, et al, 290–292
Electroretinographic evaluation of diabetic retinopathy: sensitivity of amplitude and time of response, Brunette JR, et al, 285–289
Hyper-response and delay in the electroretinogram in acute ischemia, Brunette JR, et al, 188–193
Lactate dehydrogenase level and protein pattern in the aqueous humour of patients with retinoblastoma, Das A, et al, 337–339
Preretinal membranectomy in idiopathic preretinal macular fibrosis, Mandelcorn MS, et al, 321–324
La rétinopathie à la canthaxanthine: 1. Etude clinique de 51 consommateurs, Boudreault G, et al, 325–328
Rieger's syndrome:
Autosomal dominant iridogoniodysgenesis (C), Chisholm IA, et al, 256
Role of physician:
"Be bold; but not too bold!" (E), Morgan R, 1–2
Rubeosis iridis:
Sarcoïdose et rubeosis iridis, Mayer J, et al, 197–198

Sarcoidosis:
Sarcoïdose et rubeosis iridis, Mayer J, et al, 197–198
Scotoma:
Reversibility of a glaucomatous visual field defect after acetazolamide therapy, Flammer J, et al, 139–141
Skin diseases:
Cicatricial ectropion due to essential skin shrinkage: treatment with rotational upper-lid pedicle flaps, Hurwitz JJ, et al, 269–273
Spherophakia:
Spherophakia in a Newfoundland family: 8 years' experience, Johnson GJ, et al, 159–164
Steroids:
Combined local chemotherapy for a spontaneously occurring intraocular tumour in a cat, Rootman J, et al, 185–187
Indomethacin v. dexamethasone in the suppression of corneal neovascularization, Harvey PT, et al, 293–295
Sarcoïdose et rubeosis iridis, Mayer J, et al, 197–198
Strabismus:
Atypical sensory nystagmus and its surgical management, Flanders M, et al, 349–351
Brown's syndrome: fusion status and amblyopia, Clarke WN, et al, 118–123
The oculocardiac reflex in strabismus surgery, Milot JA, et al, 314–317
Sensory results following treatment of infantile esotropia, Pratt-Johnson JA, et al, 175–177
Tests of binocular function after surgery for infantile esotropia (C), Von Noorden GK, et al, 205–206
Unilateral congenital ptosis and amblyopia, Beneish R, et al, 127–130

Surgery, operative:
Atypical sensory nystagmus and its surgical management, Flanders M, et al, 349–351
Bilateral superior oblique palsy: diagnosis and treatment, Wise J, et al, 28–32
Cicatricial ectropion due to essential skin shrinkage: treatment with rotational upper-lid pedicle flaps, Hurwitz JJ, et al, 269–273
Combined trabeculectomy and cataract extraction: modified technique, Fanous S, et al, 274–277
Comparison of iris fixation and anterior chamber intraocular lens implant, MacInnis BJ, et al, 15–17
Distribution of morphine in the eye tissues and fluids of rabbits after systemic administration and after transfer via corneal grafting, Basu PK, et al, 241–245
Effect of retrobulbar anesthesia on ocular tension, Breslin CW, et al, 223–225
Effects of nitrous oxide anesthesia on intraocular air volume, Boucher MC, et al, 246–247
Eye signs in 611 cases of posterior fossa aneurysm: their diagnostic and prognostic value, McKinna AJ, et al, 3–6
Management of acquired dacryocystitis, Hurwitz JJ, et al, 213–216
Management of inadequate transantral orbital decompression with extended lateral orbitotomy, Hurwitz J, et al, 194–196
The oculocardiac reflex in strabismus surgery, Milot JA, et al, 314–317
Pathological and surgical examination of the handling of the lacerated eyeball, McCulloch C, 178–184
Prevention and management of postoperative lateral upper-lid retraction in Graves' disease, Hurwitz JJ, et al, 329–332
Pseudophakic retinal detachment, Ramsay RC, et al, 262–265
Senile entropion: the importance of eyelid laxity, Hurwitz JJ, 235–237
Sensory results following treatment of infantile esotropia, Pratt-Johnson JA, et al, 175–177
Tests of binocular function after surgery for infantile esotropia (C), Von Noorden GK, et al, 205–206
Sympathetic nervous system:
Horner's syndrome: is it or isn't it?, Moniz E, et al, 296–298

Tanning:
La rétinopathie à la canthaxanthine: 1. Etude clinique de 51 consommateurs, Boudreault G, et al, 325–328
Thyroid diseases:
Prevention and management of postoperative lateral upper-lid retraction in Graves' disease, Hurwitz JJ, et al, 329–332
Timolol maleate:
Effect of timolol eye drops in subjects receiving systemic propranolol therapy, Blondeau P, et al, 18–21
Timolol: a 4-year follow-up study, Markowitz S, et al, 278–280
Tomography, computerized axial:
Myositic pseudotumour of the orbit, Ross WH, 199–201
Tonometry:
Effect of retrobulbar anesthesia on ocular tension, Breslin CW, et al, 223–225
Trabecular meshwork:
Autosomal dominant iridogoniodysgenesis: genetic features, Pearce WG, et al, 7–10
Trabeculectomy:
Combined trabeculectomy and cataract extraction: modified technique, Fanous S, et al, 274–277
Trabeculoplasty:
Is the green light "Go"? (E), LeBlanc RP, 101
Transient ischemic attacks:
Ophthalmodynamometry revisited, Mullie MA, et al, 165–168
Transplantation:
Cicatricial ectropion due to essential skin shrinkage: treatment with rotational upper-lid pedicle flaps, Hurwitz JJ, et al, 269–273
Distribution of morphine in the eye tissues and fluids of rabbits after systemic administration and after transfer via corneal grafting, Basu PK, et al, 241–245
Ethanol concentrations in the eye (C), Basu PK, et al, 206–207
Trauma: see wounds and injuries
Trochlear nerve:
Bilateral superior oblique palsy: diagnosis and treatment, Wise J, et al, 28–32
Brown's syndrome: fusion status and amblyopia, Clarke WN, et al, 118–123
Twins:
Optic disc colobomas, Connolly WES, et al, 299–301

Ultrasonics:
Detection of drusen of the optic disc in children by B-scan ultrasonography, Noël LP, et al, 266–268
Ultrasonography: see Ultrasonics
